

DETAILED MEASUREMENTS

GLASS AND CLAMP BRACKET WITH EXTRA CLAMPS

A - If the glass has a wider dimension than 1400 mm, extra clamps will be needed at the top and bottom to support the glass. For dimensions over 1700 mm, we recommend a total of four glass clamps for the upper and lower edges. 'A' denotes the width of the opening and also the dimensions to be specified in the configurator.

Please note that the drawings are not to scale
